

Miller Emion

Junior Software Engineer / IT Support Specialist

Cibolo, TX | hello@memion.io

<https://github.com/XtraSaltyDev> | <https://www.memion.io>

SUMMARY

Junior software engineer and IT support specialist with experience progressing from frontline technical support into software engineering in a confidentiality-sensitive environment. Builds and maintains practical software while bringing a support-minded approach to troubleshooting, documentation, user communication, and operational reliability. Army veteran with CompTIA A+, CompTIA Network+, an Associate of Applied Science in Information Technology and Networking, and a completed Bachelor of Science in Software Design and Programming.

TECHNICAL SKILLS

- **Languages and web:** TypeScript, JavaScript, Python, PHP, Java, Swift, HTML, CSS
- **Developer tools:** Git, GitHub, Node.js, npm, Astro, Vercel, SwiftPM, Vitest, ESLint, Prettier, VS Code, PhpStorm
- **IT support:** Active Directory, Remote Desktop, Splashtop, Duo Security, Microsoft 365, Microsoft Teams, WinSCP, PuTTY, Wireshark
- **Systems:** Windows, macOS, Linux, local development environments, troubleshooting, documentation, SOP creation

PROJECTS

agent-notes

Public TypeScript CLI / npm package for deterministic repository context.

- Built and published a CLI that scans Node.js and TypeScript repositories and generates reviewable AGENTS.md plus .agent-notes/ Markdown files.
- Implemented scan, init, update, and doctor workflows with JSON output, dry-run support, path targeting, and marker-managed updates.
- Used TypeScript, Commander, Vitest, ESLint, Prettier, tsup, npm packaging checks, tarball smoke tests, and fresh-cache npx verification.

memion.io

Personal portfolio site built with Astro and deployed through Vercel.

- Built a responsive static homepage with plain CSS, Astro, metadata, navigation anchors, and project/contact sections.
- Refactored the page information architecture so identity, work, notes, and contact content each have one clear location.
- Configured production deployment path with Vercel and Cloudflare-managed domain routing for memion.io.

Open WebUI Native Experiment

SwiftPM macOS project exploring native Open WebUI-style workflows.

- Worked in a Swift/macOS codebase with models, services, and views for chat, settings, knowledge, tools, automation, audio, code execution, and local storage.
- Practiced building JSON-backed storage/export services, provider models, and SwiftUI-style application surfaces.
- Focused on preserving useful Open WebUI concepts while learning native app structure and local-first workflows.

EXPERIENCE

Gavin de Becker & Associates

San Antonio, TX

Junior Software Engineer | January 2026 - Present

- Build, test, and maintain internal software in a confidentiality-sensitive environment.
- Translate operational needs and support feedback into maintainable software improvements.

- Troubleshoot defects, document behavior, and collaborate across technical and operational teams while protecting sensitive information.

Support Specialist 2 | May 2025 - January 2026

- Handled escalated technical support issues across user access, endpoint, application, and workflow problems.
- Supported troubleshooting and documentation for internal systems while coordinating with engineering and systems teams.
- Improved support handoffs by communicating clearly, documenting repeatable fixes, and maintaining confidentiality.

Support Specialist 1 | February 2024 - May 2025

- Provided frontline technical support for users, devices, accounts, applications, and routine access issues.
- Documented issues, tracked follow-up, and escalated problems with clear context for senior support and engineering teams.
- Built a strong operational foundation in troubleshooting, user communication, remote support, and support-process discipline.

Walmart, Inc.

Asset Protection Investigator | Cibolo, TX | November 2022 - July 2023

- Provided customer-facing support while handling inquiries, resolving conflicts, and documenting incidents.
- Collaborated with team members and other departments to maintain a safe, secure environment.
- Used computer systems and reporting tools for monitoring, documentation, and follow-up.
- Built multitasking and time-management habits in a fast-paced operational environment.

United States Army

Specialist, Combat Engineer | March 2019 - February 2022

- Served in high-accountability team environments requiring communication, discipline, safety awareness, and reliable execution.
- Developed practical leadership, problem-solving, and operational planning habits under pressure.

EDUCATION

DeVry University

- Bachelor of Science in Software Design and Programming, October 2025
- Associate of Applied Science in Information Technology and Networking, May 2024
- Undergraduate Certificate in Programming Essentials, February 2024

Relevant coursework: operating systems, programming, digital devices, networking, information security, Linux administration, cybersecurity, virtualization, and cloud computing.

CERTIFICATIONS

- CompTIA A+, April 2024
- CompTIA Network+, August 2025
